

* Even though hanbok is not frequently worn, it is a long term item that could be worn timelessly. Therefore, a special care is needed to preserve hanbok in a good condition. Appropriate storage and cleaning method will help keep hanbok as new.

<Hanbok Storage and Cleaning>

1. Please remove all dusts and iron the wrinkled part after wearing hanbok. Please fold hanbok neatly and keep it in a box. (Light exposure for long hours could cause color change).
2. Please avoid dry-cleaning in most cases. However, dry-cleaning is needed as soon as possible when hanbok is contaminated. (Frequent dry-cleaning may cause fabric damage)
3. Please perform dry-cleaning at a professional cleaning house.
4. Clothings could be stained with dye from naturally dyed hanbok, so please store hanbok separately from other clothings.

<Caution>

1. Horizontal silk's thick, yellow thread may look like a scratch, but it is a natural characteristic of horizontal silk. Please do not be disturbed and enjoy the beauty of silk.
2. Please avoid humidity and salinity (sweat and rain) for naturally dyed silk. In order to prevent the color change, please wear deodorant or needed underwear. When raining, please wear hanbok only inside, and avoid wearing it during doing the dishes.
3. An underskirt may have its unique smell due to the work done to its fabric. If you wish to remove, please perform a dry-cleaning.
